Woodsafe enters partnership with SCA Wood Scandinavia AB

Woodsafe Timber Protection AB is strengthening its market presence by welcoming SCA Wood Scandinavia AB as a new distributor. The partnership marks an important step in the development of the market for fire-retardant treated wood in Scandinavia and Europe.

Woodsafe Timber Protection AB has long established itself as the market leader in fire-retardant treated wood. Through the new collaboration with SCA Wood Scandinavia AB, the availability of these products will be further expanded in the Scandinavian market to meet the growing demand for sustainable and fire-safe wood products.

– “We see a strong shared potential to develop the market together with SCA Wood Scandinavia. Their market position and strong distribution network, combined with Woodsafe’s technical expertise and proven solutions, provide a solid foundation for growth and long-term development,” says Thomas Bengtsson, CEO of Woodsafe Timber Protection AB.

SCA Wood Scandinavia AB shares the vision of driving the development of fire-retardant treated wood forward.

– “The demand for fire-safe and sustainable building materials is steadily increasing. By collaborating with Woodsafe, we can offer our customers high-quality solutions that meet strict safety requirements while contributing to more sustainable construction,” says Ola Wilhelmsson, Sales and Marketing Director at SCA Wood Scandinavia AB.

Woodsafe Timber Protection AB is a manufacturer working exclusively with industrial fire retardant treatment of solid wood and plywood. The company's operations are subject to third-party manufacturing control and, since 2008, is the only manufacturer with two systems and type approval certificates according to Boverket BBR and Plan, -och Bygglagen PBL (SFS 2010:900).

Woodsafe Timber Protection AB was Europe's first CE-marked manufacturer of fire retardant treated wood and our quality and management system is certified according to ISO 9001:2015, ISO 14001:2015, ISO 45001:2018. Annually we handle more than 1400 projects with distribution all over Europe and parts of the world.

Reference projects include the world's tallest wooden skyscraper, Mjöstårnet in Brumunddal, the world's largest oak roof Gardermoen Pir Nord, Ilulissat Icefjord - UNESCO World Heritage Centre in Greenland, and Cederhusen. The WOODSAFE® brand is owned by Woodsafe Timber Protection AB.

SCA Wood Scandinavia AB markets SCA SmartTimber – a concept offering a wide range of high-quality wood products from the forests of northern Sweden. The product range is aimed at both building material retailers and industrial construction, and includes everything from decking and exterior cladding to structural timber and garden products.

With a focus on sustainability and smart solutions, SCA SmartTimber makes it easier to build with wood. The products help save time, simplify work, and improve project economics. At the same time, carbon is stored in the wood products throughout their entire lifespan – making wood construction an active contribution to a more sustainable future.
